--	---

Instructions :

Fill in the width and length boxes in imperial or metric measurements. Note that metric measurements will be converted to equivalent imperial measurements.

Follow grain direction : Check the box if the grain direction of the desired piece must follow the length (longest side). Where appropriate, the optimization of the panels will be prioritized.

Start Cut : The start cut is a squaring cut of the panel to make sure all angles are 90 degrees.

NOTE : Consider a loss of 1/3" per cut taking into account the blade.
